

BANNER COAGULATION CENTER

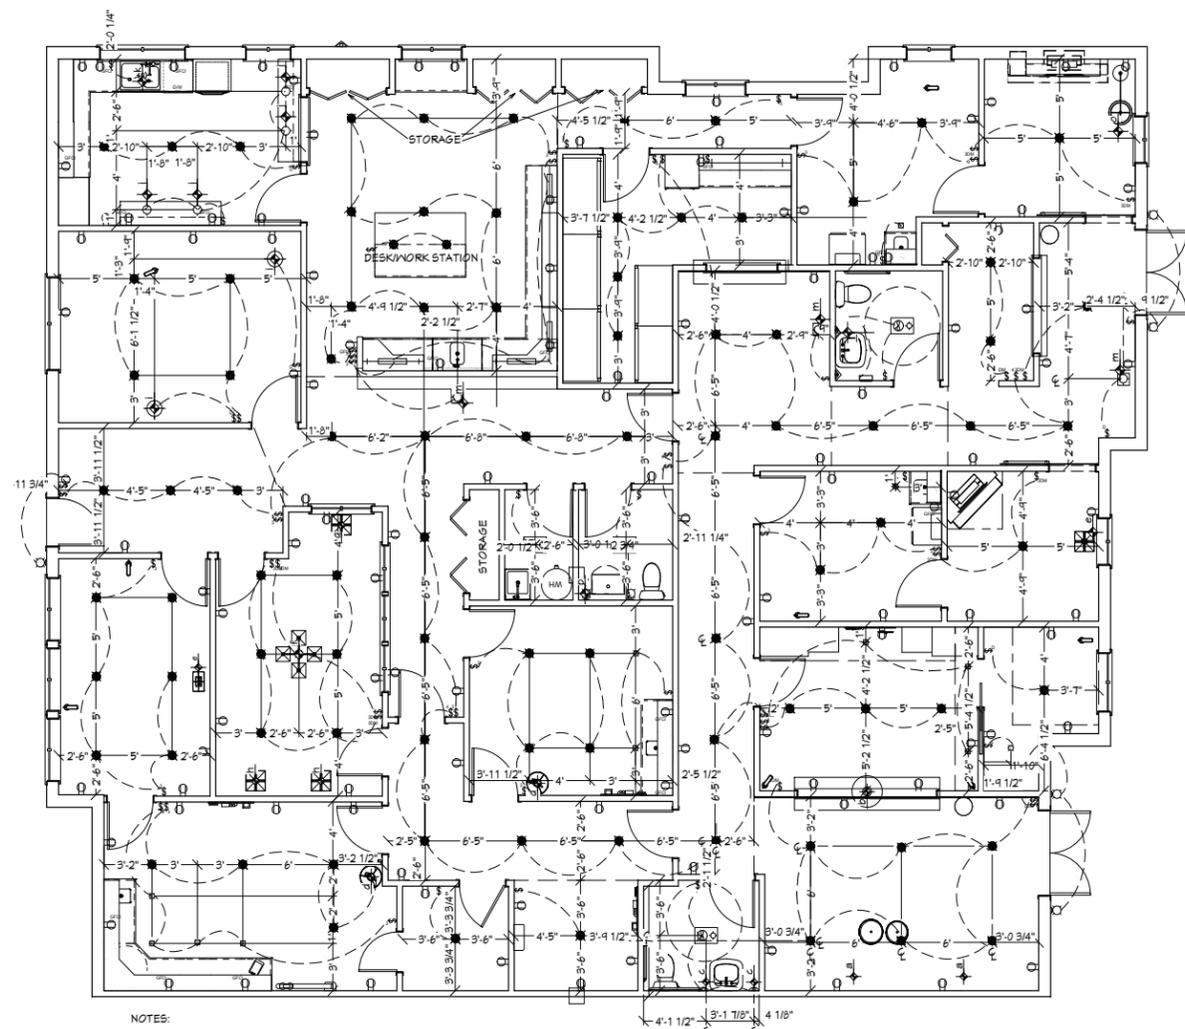

The current Anti-Coagulation Center has not been remodeled since the 1970's, and badly needed a new facelift. In addition to remodeling, the current pharmacists have expanded their medical expertise and become certified in regulating numerous blood related ailments.

The remodel will expand the Center allowing patients with diabetes, high blood pressure and other blood related issues to come to the center for more of a one-stop healthcare experience. The addition of an ultra-sound screening room will be added with an on-site radiologist, as well as a dedicated physician. A pharmacy will also be located on site. Patients will be able to visit the center as a dedicated care facility.

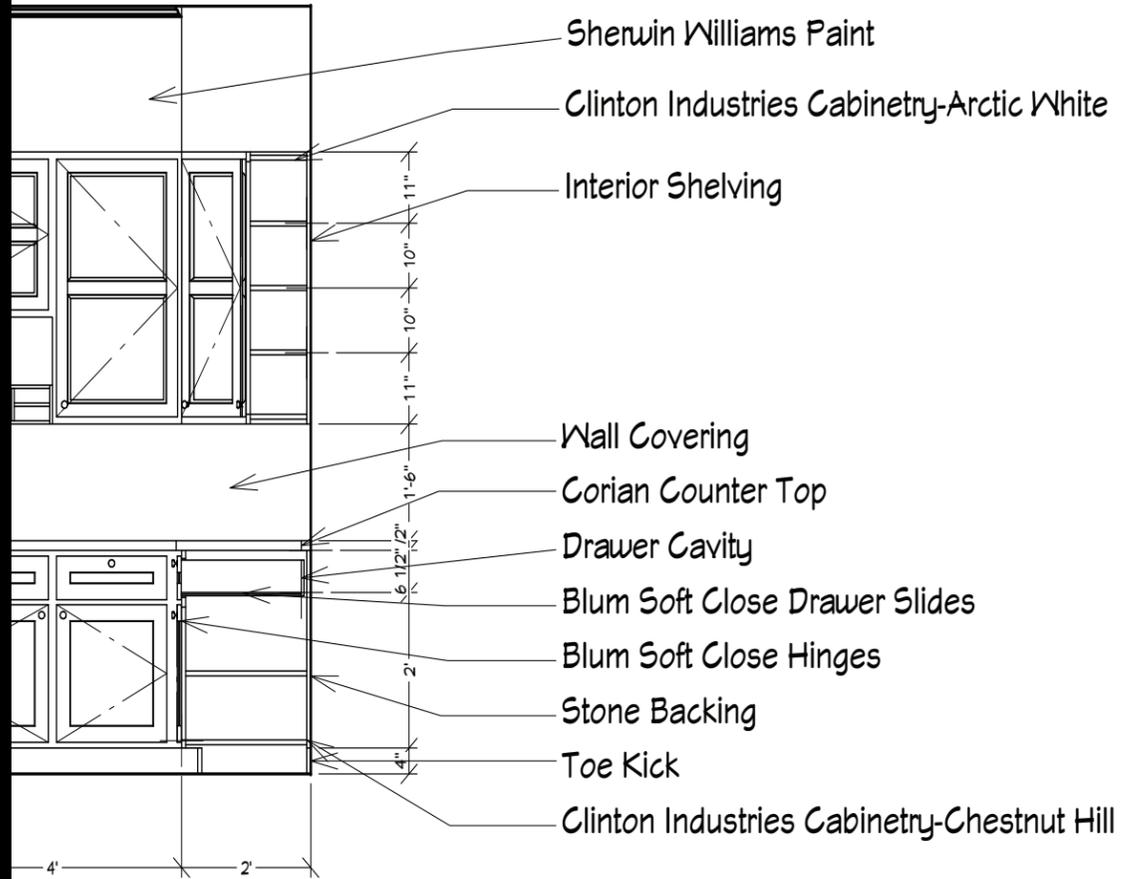

NOTES:
 5' WIDE HALLWAYS
 42" WIDE WAITING ROOM CHAIRS
 FOR BARIATRICS AND PARENTS
 WITH CHILDREN

Since most of the patients who are seen at the center must be evaluated up to as many as three times a week, they want the center to feel less medically sterile and more comfortable and “home like”.

Patient “check-in” mostly consists of letting the waiting room staff know they have arrived. Once a treatment plan has been decided upon, patients will enter private waiting rooms. Currently there are typically only three to four patients in the center at a given time, after expansion, the center will accommodate eight to ten patients at a time.

Corian® meets the high expectations of the most demanding healthcare design environments. With unlimited potential for surfaces in public spaces, operating room walls, scrub rooms, showers and baseboards, Corian® is:

- When properly cleaned, Corian® is a hygienic surface and does not support the growth of mold and mildew.
- GREENGUARD Certified® as a low VOC-emitting material
- Stain resistant
- Slip resistant
- Because of its high durability, Corian® withstands frequent contact with patient beds, wheelchairs and medical equipment.
- Operating rooms designed with Corian® surfaces resist common stains such as blood, betadine, and Gentian's violet.
- The hygienic properties of Corian® make it ideal for testing areas and labs. Excellent weather and extreme temperature resistance.
